Retail Price Indexes	18
Rainfall (agricultural areas)	19

## EXPLANATORY NOTES

Most of the tables in this publication have been prepared entirely on a monthly basis, to provide easy comparison of data. With a few exceptions, annual and quarterly figures are expressed as Monthly Averages, and these can be converted to actual totals by multiplying by 12 and 3 respectively.

For example (from page 1 opposite):

Marriages in year 1959 -  
Monthly average 551  
Therefore Annual total =  $12 \times 551 =$  6,612  
(Actual figure is 6,614)

Births in March quarter 1960-  
Monthly average 1,742  
Therefore quarterly total =  $3 \times 1,742 =$  5,226  
(Actual figure is 5,225)

The statistics as published can be adapted to give information in a number of different forms. For instance -

- (1) Details can be obtained for calendar or financial years as required, by addition of figures for the four relevant quarters.
- (2) Progress total for the year to date can be obtained by adding totals of quarters and months.

e.g. If May figures are the latest published, total for the 5 months to May =  $3 \times$  monthly average of March quarter + April and May.

This procedure can be used to calculate corresponding figures for the same period of the previous two years, or similar information on a financial year basis.

Details of production on pages 6 - 9 are for selected items only. Particulars for several commodities of considerable importance in this State have been withheld because publication would reveal confidential information.

### ABBREVIATIONS USED

Throughout this bulletin the following symbols have been used -

n.a.	Not collected, not available for publication, or not applicable
..	Nil (or less than 0.5)
p	Preliminary figures
r	Revised since previous issue

A blank space in a column of figures means the figure concerned is not yet available.

When the symbols "p" and "r" are placed in the column headed "Period" (as for example on page 11), they refer to all figures on that particular line.

(a) Registrations recorded during the period.

(b) Under 1 year of age.

(c) Excess of arrivals over departures. Interstate migration relates to recorded movements by rail, sea and air, and certain special movements by road.

(d) As at the end of each period.

NOTE: Population increases of the State can be calculated from the above figures as the sum of Natural Increase (Births minus Deaths) plus Net Migration.

## RETAIL SALES

The figures below relate to retail sales of goods (as distinct from services, repairs etc.) from fixed premises at which goods are normally sold by retail to the general public. Goods sold from hotels, garages and service stations are included but those from establishments such as clubs and guesthouses are excluded. Figures for the years 1952/53 and 1956/57 are derived from Censuses but other figures are estimates based on sample surveys.
